What you need to know?

- ❖ RSPO certified cooking oil costs about S\$2 more per tin, compared to conventional cooking oil
- ❖ Cooking oil prices are sensitive to palm oil commodity prices (prices fluctuate)
- ❖ Cooking oil for commercial use comes in tins
- ❖ Litres (volume) and Kilograms/ KG (weight) are the common measurement units
- ❖ 1 Litre of palm oil is equivalent to 0.9 Kilograms of palm oil (i.e. 17kg = 18.9l)
- ❖ Look out for the term “net weight” on the tin packaging, which will usually refer to the weight of oil, net of the weight of the tin.
